Profile

Resourceful and dedicated IT professional looking to expand my skill set into software development. Software development has always been a passion of mine and after spending some time gaining experience through entry level IT work, I am ready to jump full force into the world of software development. I have experience with numerous languages and frameworks such as Java, HTML, CSS, and Vue.js that will prove vital to my preferred roles.

Employment History

Computer Support Specialist , Karpinski Engineering , Cleveland

February 2017 — May 2021

- Configured new tech for employees and set up internet networks, DNS servers.
