Profile

Resourceful and dedicated IT professional looking to expand my skill set into software development. Software development has always been a passion of mine and after spending some time gaining experience through entry level IT work, I am ready to jump full force into the world of software development. I have experience with numerous languages and frameworks such as Java, HTML, CSS, and Vue.js that will prove vital to my preferred roles.

Employment History

Computer Support Specialist , Karpinski Engineering , Cleveland

FEBRUARY 2017 — MAY 2021

- Acted as lead for any hardware changes on computers in the workplace.
- Provided training and product support to customers, resulting in a reduction in customer support inquiries

Information Technology Service Desk, Union Home Mortgage

MARCH 2023 — PRESENT

- Developed user-friendly training materials and conducted training sessions to empower employees in utilizing software and hardware resources effectively.
- Proficient in diagnosing and resolving hardware and software issues for end-users, resulting in a reduction in downtime and increased overall productivity.

Education

Bachelor's Computer Engineering, Cleveland State University
